Summary

Systems Analysis and Development student at Senac PE, graduating in December 2026, seeking a front-end or game development internship. Built a React and Capacitor app, a Flask REST API with automated tests and a Python ETL pipeline using Brazilian Central Bank data. In a team, led project management and built the coordinator flow of an Android app in Kotlin. Years as a private tutor made me good at explaining concepts and working with method. Fluent in English, advanced in Spanish.

Experience

IT Teaching Assistant — Faculdade Senac Pernambuco
Recife, Brazil · During my degree

- Supported students in IT courses, answering programming questions and guiding hands-on activities.

Private Tutor — Self-employed
Recife, Brazil · 2023 – 2025 and 2016 – 2018

- Taught all elementary and middle school subjects, plus physics, history, English and writing for high school students.
- Planned lessons tailored to each student's pace and difficulties.

Private Driver — Self-employed
Recife, Brazil · Aug 2026 – present

- Direct customer service and self-managed scheduling and routes.

Projects

Feira Plus+ — Aisle-based shopping list app
React, Vite, Capacitor (Android), localStorage · github.com/Biieru/Feira-PLUS

- Built an app that sorts a shopping list by aisle for three wholesale chains, parsing typed quantities and units.
- Implemented item check-off, TXT and JPG export and an accessible interface with dark theme and large type.

Canes — Strategic management Android app (capstone, team of 6)
Kotlin, Android, SQLite · github.com/caiobarrosmelo/Canes_PI_2025

- Led project management and built the entire coordinator user flow for registering and tracking strategic actions.

etlBCB — ETL and data analysis with Central Bank data (solo)
Python, pandas, SQLite, MySQL, SQLAlchemy, scikit-learn, Prophet · github.com/Biieru/etlBCB

- Built a pipeline that consumes the Brazilian Central Bank open data API, cleans data with pandas and loads it into SQLite or MySQL.
- Analyzed payment methods (Pix and cards) and trained credit card spending forecasts with Random Forest and Prophet.

BooksAPI — Book REST API
Python, Flask, SQLAlchemy, Swagger, pytest · github.com/Biieru/BooksAPI

- Built an API with full CRUD, Swagger documentation and automated tests with pytest.

Caminho das Constelações (Path of the Constellations) — Tabletop RPG system
Game design, narrative · caminho-das-constelacoes.onrender.com

- Created an original RPG system with d100 rules, narrative points and a showcase website.

Writing

- 7 articles published on dev.to (2026) on AI for learning, gamification, augmented reality in educational games and AI governance in cybersecurity.

Technical Skills

- Front-end and mobile: React, JavaScript, Vite, HTML5, CSS3, Capacitor, Kotlin (Android)
- Back-end and data: Python, Flask, SQLAlchemy, SQL (SQLite, MySQL), pandas, REST APIs
- Testing: pytest, unittest
- Tools: Git, GitHub, Figma, Android Studio, Jupyter, VS Code
- Games: game design and RPG narrative

Education

Associate Degree in Systems Analysis and Development — Faculdade Senac Pernambuco
Recife, Brazil · 2024 – 2026 (expected December 2026)

Biomedicine — Unibra
Recife, Brazil · 2021 – 2023

Languages

- Portuguese: native · English: fluent · Spanish: advanced · Japanese: basic
